

Cobwebb Mobile POD

capture customer delivery information
and signatures for instant proof of delivery

Cobwebb Mobile POD can integrate seamlessly into Cobwebb Document Management

COBWEBB MOBILE POD //

is a tool for cost-effective proof of delivery using the latest available hardware and software advances.

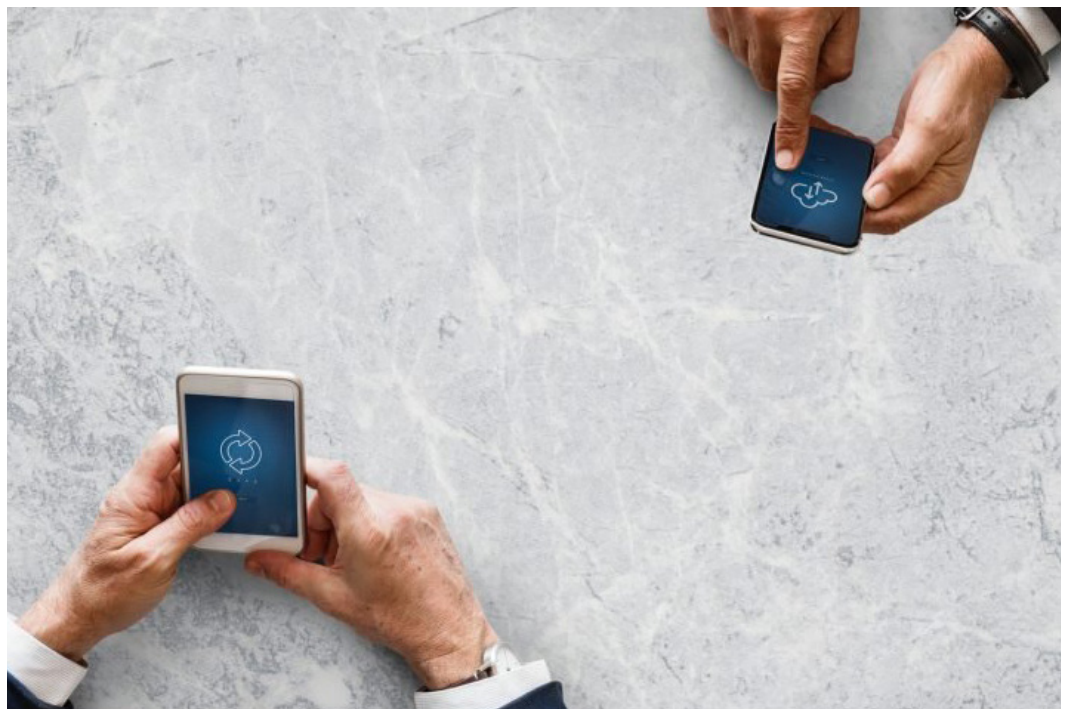

Benefits

- Four easy steps to mobile signature capture and storage:
Scan > Capture > Upload > Retrieve
- Reduce the cost of delivery
- Scalable and cost effective
- Cuts the cost associated with processing documents
- Focuses on the delivery of the product

- Customer service can focus on completing the actual transaction instead of administration

Cobwebb Mobile POD is a mobile application (app) for teams in the field wanting to quickly capture proof of delivery and upload it to the back office systems.

Cobwebb Mobile POD can integrate seamlessly into Cobwebb Document Management.

—
IBM i integrated

MAKING THE LINK //

This android based app allows your transport fleet to focus on delivering product while the device takes care of the paperwork. By storing the critical receipt sign-off and associated key data, the driver can then focus on the next delivery on the route. Once he has completed the delivery, the data is uploaded to the electronic archive to link up to the delivery notes, completing the receipt of delivery.

There are numerous benefits when linking the flexible Cobwebb Mobile POD solution to Cobwebb Document Management. The customer service team back at the office can instantly search/view the captured data, respond to enquiries and help keep the focus on customer service throughout the transaction.

THE COBWEBB SOLUTION //

All of our products are developed with business efficiency improvements and cost saving at the core of the solution. Cobwebb Mobile POD positively affects the profitability, while delivering measurable enhancements in customer, supplier and internal communication and customer service carbon footprint.
