

Ephesoft Transact Solution Overview

Turn Your Data into Assets

The rise of data, content and document volume is unprecedented. This widespread growth makes managing all your company's information nearly impossible, as 80% to 90% of it is unstructured data. With analysts predicting an even faster, 10-fold growth rate of data over the next 5 years, the global datasphere will be hard to manage. Whether it's paper documents, emails, chats, PDFs or other types, the information is often inaccessible, unsearchable and requires manual processes to unlock that data. If an organization doesn't have a comprehensive view of their data, they can't create context or drive business decisions.

Snapshot: What, Where & More

Automate data capture to spearhead digital transformation and gain control of your content

Delivery

Cloud, Hybrid or On-Premises

Operating Platform

Windows or Linux

Easy Integration

Web Services OpenAPIs into any system

Add-Ons

Advanced Reporting

Cloud HyperExtender

Accelerator for Invoices

Innovation at Your Fingertips

Ephesoft Transact is an enterprise content acquisition and data discovery platform, in the cloud, hybrid or on-premises, that automates any content-based business process and makes meaning out of unstructured data for decision-makers worldwide. Rather than typing in data and routing it via paper or email, Ephesoft captures and digitizes the content from the start, initiating the digital transformation process. Next, Ephesoft automatically identifies the document type, extracts key information and delivers it directly to any type of repository or workflow.

This significantly accelerates time-to-value for business processes and workflows, including invoices, mortgages, claims, contracts, records, mail, background checks and other important transactions. Ephesoft's platform improves accuracy, increases productivity and dramatically reduces costs. By leveraging content capture to enrich digital processes, Ephesoft positions customers for better outcomes with usable data.

You Need Data for Digital Transformation Processes

ACQUIRE

Any Source, Any Format

Physical documents, electronic documents and document images via mailbox, email, fax and file transfer.

ANALYZE

Automate

Intelligently identify document types and metadata.

DELIVER

Enable

Integrate and automatically send data to ERP, ECM, RPA or other line of business systems.

Now That Your Data is an Asset, What's Next?

As the first step of digital transformation – making meaning out of unstructured data – Ephesoft can be bundled with new and existing products, from RPA tools to workflow platforms, ECM, ERP or other repositories using Web Services OpenAPIs. This allows customers to have best-of-breed solutions to meet their unique requirements and delivers faster time-to-value.

Free Your Data

The power and speed of the cloud can set you apart from the competition. At Ephesoft, we take an accelerated, cloud-first approach, but understand that some industries and organizations must stay on-premises. For that reason, we introduced the first-to-market hybrid cloud solution that bridges the gap for the most process-intensive capture so on-premises systems can benefit from the cloud. Ephesoft Cloud HyperExtender module conveniently accomplishes this, increasing processing speed by 10X.

Your processes are fueled by actionable, structured business information. You want to convert the data that's trapped in your documents into useful information. We know it has to be accurate, cost-effective and fast. That's why the end results are happier customers and employees who are freed up to focus on what they do best, not the mundane. Are you ready to challenge the status quo? We are.

Prove It

Ephesoft has helped organizations from Fortune 100 companies and highly regulated government agencies to small businesses that process from thousands to millions of documents.

Here are just a few examples of what our customers report:

- Increase in productivity by 400% for finance company
- Labor savings average 30% to 50%
- Reduces overall processing time by 50% to 80%
- Cuts document prep time by 50% and cut indexing efforts by 75%
- Audits went from several weeks to several hours
- Ability to find 99.9% of documents
- Throughput accuracy rate for up to 96% of documents
- Reduced mortgage closing docs from 15 min to 5 min; cut classification processing from 45 min per loan to under 5 min

That's why we call it Smart Capture® technology, fueled by Ephesoft's revolutionary Context Driven Productivity platform.
