

Cobwebb File

makes it possible to share and store your output from applications and report more easily and efficiently

Generating files (in various formats such as PDF, SCS, DOC, CSV, and TXT) for distribution to IFS, Windows or other network-connected folders

COBWEBB FILE //

Sharing and storing your output from existing ERP (Enterprise Resource Planning) applications has never been easier. Cobwebb File output device enables users to automatically turn their IBM i spooled files into either .TXT or .PDF files using the full reformatting power of Cobwebb Document Management. This enables documents such as purchase orders, invoices and credit notes etc. to be reformatted and converted, including barcodes if required. If you are already using Cobwebb Document Management to reformat your prints, then the creation of your file output could not be easier. You can use the existing formatting of your printed, faxed or emailed output and just include an extra file output device in your Cobwebb Document Management definition file.

File names can be dynamically allocated using data from the spooled file such as order number, invoice number etc., to facilitate retrieval.

Benefits

- Automated document archiving
- FTP using Cobwebb Document Management
- Send IBM i business documents automatically across your network
- Fully integrated with Cobwebb Docstore, The Cobwebb Document Management archiving module
- Reformatting and distribution occurs entirely on the IBM i

PRODUCT // COBWEBB FILE

More product info:

Files can be archived in various ways:

- As an IBM i physical file member
- As an IBM i document in a folder
- As a file in the IBM i integrated filing system

Features

ARCHIVING //

Archive your faxes, emails, prints produced using Cobwebb Document Management. An automatic program may be called when creating Cobwebb File output to enable selected data from the output to be included as keys to the PDF data stream for automatic retrieval by your archive package.

FTP //

Using a Cobwebb supplied program to which you supply the necessary FTP information e.g. IP address, User Name, Password etc. you can successfully send your file across your network in either .TXT or .PDF format.

FULLY INTEGRATED //

Cobwebb Document Management can produce reformatted file output at the same time as producing prints, emails, faxes and XML data streams.

NETWORK STORAGE //

Store your formatted business documents directly on a PC or server for ease of access and reference.
